Career Objective

Motivated Computer Science undergraduate with strong foundations in software development, MERN stack, and AI-based systems. Seeking an entry-level software role to contribute to scalable solutions while continuously learning in a dynamic MNC environment.

Education

B.Tech in Computer Science & Engineering

Vignan's Foundation for Science, Technology & Research
CGPA: 7.67

2023 – 2027

Technical Skills

Languages: Java, Python, C

Web Technologies: HTML, CSS, JavaScript, React.js, Node.js, Express.js, React Native

Databases: MongoDB, MongoDB Atlas, MySQL

Tools: Git, VS Code, Docker (Basics)

Concepts: OOP, Data Structures, REST APIs, Software Development Lifecycle

Projects

- **Department Notification Dashboard App** – React Native, Node.js, MongoDB Atlas *Present*
 - Currently developing a centralised dashboard to manage and broadcast department-level notifications
 - Implementing role-based access control for faculty and students with real-time updates
- **Real-Time Collaboration Tool** – React, Node.js, WebSockets
 - Built a live multi-user document editor with real-time synchronisation
 - Implemented efficient socket-based communication for concurrent users
- **AI Chatbot System** – Python, OpenAI API
 - Developed an LLM-powered chatbot with contextual memory
 - Improved response relevance using optimised prompt engineering
- **College Fest Management Portal** – MERN Stack
 - Designed a full-stack portal with role-based authentication
 - Automated event registration and participation tracking
 - **Access Link**
- **E-Commerce Web Application** – MERN Stack
 - Implemented JWT authentication, admin panel, and cart management
 - Built complete product lifecycle workflows

Publications

- **ML-Based Weather Forecasting Using Regression and Time-Series Models**
Published at *Mount Zion ICACRS Conference*. Focused on climate prediction using supervised machine learning techniques and optimised feature engineering.

Internship Experience

Web Development Intern

- Developed and deployed 5+ responsive UI components using React, improving overall user experience and interface consistency
- Collaborated with a 4-member development team following agile sprint-based workflows
- Optimized component rendering and state management, reducing page load time by approximately 20%
- Assisted in integrating REST APIs, improving data flow and reducing manual updates

Certifications

- MERN Stack Web Development
- Python (Basic) – HackerRank
- EF SET B2 – English Proficiency

Achievements & Leadership

- 2nd Place – Hackathon (2025) for AI-driven solution development
- Joint Secretary – Alumni Linkages (2024–25)
- Vice President – Alumni Linkages (2025–26)
- Participated in multiple college-level hackathons
- Solved 200+ coding problems across platforms

Soft Skills

Problem Solving, Team Collaboration, Communication, Adaptability, Learning GenAI
